

I am a hidden beauty

That only the bravest shall see

Let me put it simply.

I am full of revelations!

I have an underground ecosystem that is mind-blowing,

Ancient art that twists the minds of historians,

Scattered artifacts that hide their stories carefully,

and so much more.

I am hundreds of kilometers long and 2000+ kilometers deep!

I have water that rushes to those humans in need,

Paths so one may explore,

And all the information those scientists need!

So, tell me why I am not well taken care of?

I have litter, and am continuously losing my waterways because nobody knows me,

**My hidden beauty.**

Take the step up, and help me to achieve my greatest health!

Tell your family, friends, classmates, teachers, about the wonderful

Karsts,

Caves,

And water that lies within them.
